

Testnet Deployment Transaction Evidence - Milestone 1

Project: Rolling Loans: Continuous Borrowing on Danogo

Milestone 1: Smart Contract Development

Evidence scope: detailed test results, technical report describing test scenarios, testnet deployment transaction evidence, and Preview/Preprod transaction IDs demonstrating functionality.

1. Deployment / Reference Transaction Evidence

The table below lists the testnet deployment/reference transactions used to demonstrate the smart contracts involved in the Milestone 1 rolling-loan test flow.

Smart contract	Role in Milestone 1 test flow	Transaction ID	Cardanoscan link
Float Pool Script	Source pool accounting used by the source loan path	2709db63040f43cd5eb4bc10b571b71ecf9d3ed94b870895331452ad4571cc2a	https://preprod.cardanoscan.io/transaction/2709db63040f43cd5eb4bc10b571b71ecf9d3ed94b870895331452ad4571cc2a
Float Loan Script	Source loan contract holding the existing active loan position	a8ecef50e47e4084ad3085b99093b56d5e8c48b55a4641748a700d31e48a96b	https://preprod.cardanoscan.io/transaction/a8ecef50e47e4084ad3085b99093b56d5e8c48b55a4641748a700d31e48a96b
Leverage Pool Script	Target pool accounting used by the target loan path	d9cf6b2d222eaf86afd97de6e0f150ec252031a8c6dbac9253d99f45d883a837	https://preprod.cardanoscan.io/transaction/d9cf6b2d222eaf86afd97de6e0f150ec252031a8c6dbac9253d99f45d883a837
Leverage Loan Script	Target loan contract receiving the new loan position	d8dc1fcc5fcec28d043b7658797b081c85bdbd42140839d5bab0c58cb7b000f6	https://preprod.cardanoscan.io/transaction/d8dc1fcc5fcec28d043b7658797b081c85bdbd42140839d5bab0c58cb7b000f6

2. How to Verify

Open each Cardanoscan link, confirm the transaction on Cardano Preprod, and cross-check the contracts involved in the rolling-loan execution transaction. The rolling-loan execution transaction uses these source/target contract roles to demonstrate cross-contract refinancing.

3. Note for Internal Private Testnet Logs

If the Milestone reviewer requires non-public private testnet logs in addition to Cardanoscan-verifiable Preprod links, attach the private node submission logs, network magic/configuration, query-utxo outputs, and the corresponding private testnet transaction hashes as an appendix to this file. The public Preprod links above are included to make reviewer verification easier.
